

THE MANITOU

LET'S
BUILD
MECHA!

The music on this e.p. was, in part, created for Brokensea Audio Productions' *Doctor Who: Mechalution*.

<http://brokensea.com/drwho/>

It was realised using a combination of circuit-bent devices, found sound, and vintage synthesizers. The song *Let's Build Mecha* was intended for my forthcoming album *Blips And Bleeps*. The remainder of the tracks were inspired by Paul Mannering's excellent script. I'd like to thank the creative team behind the show for the opportunity to work on this project.

-TM, July 2010

1. The Theory Of Mechalution

(Instrumental)

2. Let's Build Mecha!

Destroy Tokyo
Destroy Paris
Destroy London
Destroy Beijing
Destroy Los Angeles
Destroy Moscow
Destroy Vancouver
Destroy the world

Let's build Mecha
Build them strong
Let's build Mecha
It won't take long

Let's build Mecha
Invade Japan
Let's build Mecha
I know we can

First the village
Then the town
Then the cities
We'll take them down

Mecha!

Let's build mecha
And climb inside
Let's build mecha
Go for a ride

People scurry
All around
Our giant mecha
Shake the ground

Arms with cannons
Laser eyes
Legs with rockets
Take to the skies

3. Robots On Romney Marsh

(Instrumental)

4. Clockwork Robots Aren't Impossible

*Clockwork
Robots
Aren't
Impossible*

5. Autonomic

We are autonomic

6. Production Line

Factories stretch
For miles and miles
There's no-one left
To work inside

But something there
Still has control
A silent mind
Without a soul

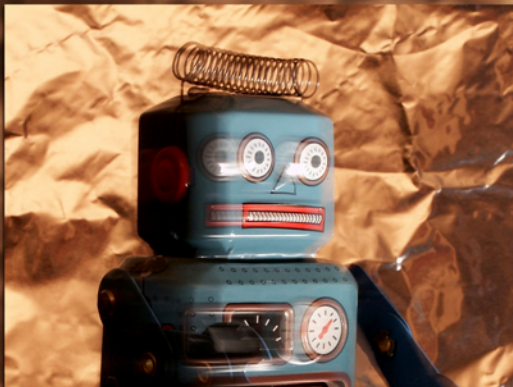

Production line
Keeping time
Production line
Until the end of time

Everyday
Machines are made
They do not tire
They do not fade

They take the ore
Out of the mines
And feed it to
Production lines

7. Rust And Bones

(Instrumental)
